

PRESS RELEASE

STATION CONSTRUCTION BY ELECTRO-PRODUCTION OF THISVI S.A

ELECTRO-PRODUCTION OF THISVI S.A., in which participate Edison, ELLINIKI TECHNODOMIKI, INTRAKOM and VIOHALCO Groups, is going to construct a thermal unit with combined cycle of approximately 400 MW in Thisvi (Viotia).

During 2006, the company intensely promoted the development of the project, for which the installation license has been issued by the appropriate authorities.

The decision for the investment is expected to be validated by the Boards of Directors of the companies participating in the project, in forthcoming days.

Edison and Elliniki Technodomiki believe in the dynamics of the Greek market's development, which is growing at a fast pace, above the E.U. average and aim at establishing a stable and significant presence in the local arena.

The realization of the Thisvi project is part of the general strategy of Edison and Elliniki Technodomiki for a leading positioning in the Greek market via the gradual development of efficient production resources of different types of stations.

Edison has been active in Greece since 2001, and operates through its subsidiary "Edison Hellas SA".

Elliniki Technodomiki Group, has been keenly activated, since 2000, within the whole range of Energy production projects, through its companies "Hellenic Energy and Development" (HE&D), "Elliniki Technodomiki Energiaki" and "Helector", pursuing a major position in the Greek Energy market which is in liberation process.
